PROJECTS

[AI Grievance Redressal Platform ↗](#)

Feb 2025 - Apr 2025

Built an AI-powered grievance redressal platform using NLP techniques such as sentiment analysis, urgency detection, fraud detection, and GPT-2-based auto-response generation, and FastAPI backend.

[Secure File Management System ↗](#)

Apr 2025

Developed a secure file encryption system using AES-256 with XOR-based obfuscation, integrated MFA via Google Authenticator, and implemented SHA-256 hashing for enhanced authentication and data integrity using JavaScript and CryptoJS.

[Ethical AI Governance Toolkit ↗](#)

Jun 2025 - Present

The Ethical AI Governance Toolkit is a project that helps organizations audit their AI datasets and models for ethical compliance. It provides tools to detect bias, generate dataset fingerprints for verification, flag unauthorized or illegal training data, and protect user-uploaded data from misuse.
